WHY SELECT A NOVELLINI BATHTUB

MADE IN
ITALY

100% MADE IN ITALY

All our products are manufactured at our plant based in Mantua, Italy. Our mastery over the complete production chain allows us to ensure the highest quality levels in terms of the finished goods and components used.

CLIENT SERVICE UK

Our team works daily to offer customized solutions to your requests and to answer your queries. With our commitment to improve the quality of our services, we provide technical support to all our clients and product users. We provide After-Sales services in all of UK.

HEAD OFFICE / Borgo Virgilio - Mantua - Italy

CRAFTSMANSHIP

Proud of its history of over 50 years, Novellini became a European benchmark in the field of bathrooms, valued both by professionals as well as users. Since the beginning, we have been using the best technologies and the latest trends in terms of design to offer you a unique wellness experience.

EQUIPMENT

Based on the version, your bathtub will be delivered with all the equipment required for its installation: self-supporting tub feet or frame, head cushions, automatic emptying, fittings or filling system by emptying. All our bathtubs exist in versions with or without whirlpool massage.

STANDARDS

All our products are designed and made to be compliant with the most recent European standards in terms of quality and security. From raw materials to finished goods, including the assembly of various components, every phase is planned with attention, is subject to checks and is verified to guarantee the characteristics corresponding to the standards required by the European authorities.

MATERIALS

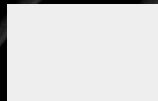

WE USE PREMIUM QUALITY MATERIALS SO YOUR BATHTUB PROVIDES YOU COMPLETE SATISFACTION

SYNTEK

This reinforced plastic material enables us to create models with highly varied designs. With a pleasant feel and easy handling, it has excellent insulating properties and provides exceptional comfort, since it quickly assumes the bath water temperature. The surface of Syntek is naturally anti-slip and guarantees optimal grip. Tested with a slope greater than 24°, our bathtubs comply with the PN 24 standard. Available in the collections Divina, Sense, Classic and Comfort.

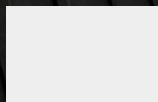

glossy white
classic

matte white
exclusive, soft
and silky

NOVOTECH

Extremely solid and highly aesthetic, this exclusive material contains a high percentage of natural mineral fillers and highly pure resins. Due to its extraordinary qualities, it allows us to create organic and sinuous forms in dynamic and sensual styles. The solidity of Novotech provides maximum security to free-standing bathtubs. Its smooth and silky feel is a real pleasure to touch. Available with the Novotech collection.

matte white

PANELLING

We offer a wide selection of panelling finishes to provide a traditional or unique style to your bathroom. Our water-resistant panelling has solid design that holds very well over time. Panelling is available in assorted finishes in our furnishings collection.

DESIGN

DESIGN AND VISUAL PLEASURE CONTRIBUTE LARGELY TO YOUR WELL-BEING. THIS IS WHY WE ASK THE BEST DESIGNERS TO DEVISE THE FORMS AND ERGONOMICS OF OUR BATHTUBS.

MARCO PELLICI
DESIGNER

SIMONE MICHELI
DESIGNER

MASSIMO FARINATTI
DESIGNER

We bring the excellence of Made in Italy design to the centre of your bathroom space. Our designers engineer the environments and individual elements so you can feel the wellness upon first look. Comfort and ergonomics are seamlessly blended with style and an aesthetic vision to bring you the bathroom you desire.

ALL THE PLEASURES OF WHIRLPOOL MASSAGES

Our massage offer
will serve your needs.

To unwind, to tone up
or to take care of your skin...
Among our massage systems,
you will certainly find
the one that perfectly fulfils
your wellness requirements.

SILENCE

A whirlpool bath is a privileged moment that lets you focus fully on your well-being. This is why we pay a lot of attention to comfort in terms of sound levels. The pumps and wind tunnels of our bath tubs have been studied to preserve the calm during your whirlpool sessions and lull you with the soft sound of water in movement.

YOUR WELL-BEING IN A SINGLE GESTURE

Irrespective of the collection you select, you will be enamoured by the simplicity of use of the massages. We have studied our keyboards and remote controls to allow you easy access to all functionalities.

OUR MASSAGE SYSTEMS

RELAXED

Are you searching for a means to relax?

> Select the **Air** massage.

Air caresses the body and has a relaxing effect in all gentleness. The air bubbles give you a sensation of lightness, fighting fatigue and reducing tension due to stress. Air is projected through injectors provided at the base of the bathtub.

TONIC

Do you prefer a tonic and stimulating massage instead?

> Take a look at the **Water** massage.

Water provides a deep massage that helps improve blood circulation and reduce muscle tension. Water massage removes toxins and helps plump up the skin. Water massage with adjustable speed is produced by nozzles available on the vertical walls of the bathtub and is linked to a pump.

CARING FOR YOUR BATHTUB

It is necessary to take care of your bathtub to derive benefit from it for a long number of years.

AUTOMATIC DRYING

All our Air systems have an automatic drying system that starts when the bathtub is emptied to clean the air streams and remove the remaining water and impurities.

DISINFECTION

It is indispensable to regularly clean (twice or thrice a month) the water pipes of your bathtub. To do this, we suggest using products customized for the whirlpool bathtubs that protect the equipment.

Rinse your bathtub, fill it with water while adding the disinfectant and start the disinfection program or simply a water massage if your bathtub does not have a special program.

RELAXED AND TONIC

Do your requirements change according to your lifestyle?

- > Take massages from the **Mixed** system.

A combination of the Water and Air systems, the mixed massage fulfils all your wellness requirements and offers you the relaxing benefits of air and the invigorating properties of water. The bathtub has water nozzles on the vertical walls and air injectors at the base of the bathtub.

CARE

Do you wish to offer your skin and body a rejuvenating bath?

- > Our **Natural Air** exclusive care system is made for you

The Natural Air system mixes the pleasure of a relaxing bath with care for the skin. Thousands of micro air bubbles mix with the water jet and form a delicate cloud of oxygen that washes over the skin and improves its elasticity. One or two micro-bubble dispensers are placed on the walls of the bathtub.

NATURAL**AIR** TECHNOLOGY

The micro air bubbles, up to a 100 times smaller than the air bubbles produced by a classic air system, saturate water by transforming it into a soft mixture and giving it the feel of a delicate milk bath.

They stick to the skin, removing impurities, dead cells and sebum. The soft sensation on the skin lasts all day long and a 20 minute session alone suffices to derive maximum benefit.

The oxygen released by the Natural Air system stimulates the production of collagen, an important protein in our body, which plays an essential role in the functioning of organs and tissues. Collagen increase is a natural anti-ageing remedy that reduces wrinkles and smoothens your skin to return its vitality.

IT IS NOT NECESSARY
TO RUN ALL AROUND THE WORLD
TO FIND
INNER PEACE.

YOU CAN FIND YOUR SAFE HAVEN AT HOME.
SINK INTO YOUR BATH AND SURRENDER TO THE MAGIC OF WATER.

A 15-20 MINUTE SESSION SUFFICES TO RESTORE
YOUR TRANQUILITY AND VITAL ENERGIES.

WELLNESS

**TO MAKE EACH OF YOUR WHIRLPOOL SESSIONS UNIQUE, OUR
BATHTUBS OFFER YOU FUNCTIONS THAT TRANSPORT
YOU INTO A WELLNESS BUBBLE**

MUSIC

Listen to your favourite pieces of music during your bath.

Bluetooth

A Bluetooth connection allows you to connect your smartphone, tablet or PC to the bathtub so you can listen to your playlists. You monitor your music through your playback. The Bluetooth technology is provided in bathtubs from the Divina and Sense collections.

RDS Radio

Listen to your favourite radio programs! You can manage your radio channels through a remote. The RDS Radio function is available in the Sense bathtubs.

CHROMOLIGHT

Liven up your moments of relaxation with a play of multicoloured lights diffused in the bath water. Relaxing, energizing or captivating,... You can let the colours play or select a colour of your choice.

DIVINA COLLECTION

DESIGN AND PLEASURE

The real star of the Novellini bathtubs, the Divina collection sets itself apart by its soft and elegant lines. The original design of these bathtubs with bevelled edges is highlighted by the quality and uniqueness of materials. Easy to use, they offer a very wide range of water and air massages. Assuredly pleasing to the body and the eyes!

Sensitive, intuitive keyboard integrated on the edge of the bathtub. A light touch on a key switches the function on.

The water nozzles in strips enable ensuring full body coverage.

To better target the body parts that require stimulation, the direction of these jets can be adjusted.

The nozzles are back-lit in the Hydro Plus and Natural Air+Whirlpool versions.

The air injectors placed at the base of the bathtub are flush and almost invisible, providing maximum comfort during your bathing experience.

All the bathtubs of the Divina series have a practical snap emptying function. The cover cap is made in the finish selected for the bathtub.

FILLING BY EMPTYING

This system combines the filling, emptying and overflow function and advantageously replaces the classic pouring nozzle to give you ease in use.

OBJECT-HOLDING SHELF

Shelf to be fixed on the edge of the bathtub. Its internal structure provides it exceptional solidity and the polyurethane coating makes it pleasant to use.

Customized for all bathtubs from the DIVINA collection.

OBJECT-HOLDING TRAY

This tray can be placed at a location of your choice. Its solid structure makes it particularly stable. Customized for the DIVINA 35, DIVINA and DIVINA F bathtubs.

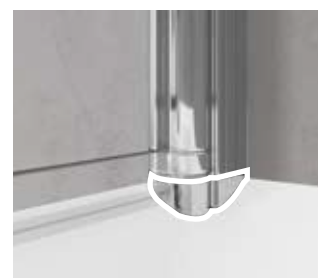

BATH SCREENS

The rectangular DIVINA 35 and DIVINA bathtubs can be completed with bath screens from the Novellini range:

- YOUNG TV: bath screen with 1 rotatable pane
- YOUNG 1 BSV: bath screen with 1 rotatable and foldable pane

Glass with 6 mm thickness. White, Silver, Chrome or Matte black outlines
A customization kit is required for installation

HYDROSILENCE KIT

The turbines and pumps fitted in our bathtubs are soundless to let you enjoy your massages to the utmost. The Hydrosilence kit additionally enables reducing noise and vibrations to make your whirlpool sessions even more quiet.

SENSE COLLECTION

A COMPLETE RANGE OF JETS AND MESSAGES

The Sense collection has been made to offer you perfect comfort and timeless aesthetic.

We studied where to place the jets to act on the sensitive areas of the body and provide you maximum relaxation. The air and water massage combinations will fulfil your expectations in terms of relaxation and vitality.

Touch screen remote control Touch Screen enables accessing the bathtub functions easily.

The Sense collection jets have been created to offer complete massages. Their positioning has been specially examined to help the reflex areas of the body, with specific attention to the dorsal and plantar areas.

To help you live exceptional moments of relaxation, we have provided all the Sense massage systems with a multicoloured chromo spot, that will plunge you into relaxing or dynamic ambiances.

All the systems of the Sense collection contain speakers to let you enjoy the music diffused by Bluetooth connection or to listen to your favourite radio channels.

SENSE CLASSIC

INITIATION TO WHIRLPOOL MASSAGE

The Classic collection is perfect to step towards the discovery of the pleasures of a whirlpool.

This affordable collection offers a selection of bathtubs in traditional forms and essential massages. You will appreciate the simple operation and a selection of bathtubs that will easily integrate into the contemporary and classic ambiances.

Electronic keyboard with a sober design to enable easy massage monitoring.

The massage systems of the Classic collection perfectly suit all those who wish to try a whirlpool experience. Essential and affordable massages.

The classic design of these models enables integrating them easily in all types of ambiances. They benefit from top-of-the-line materials and our complete know-how in terms of design and well-being.

The ergonomic and hygienic head supports of the bathtubs in the Classic collection offer exceptional comfort (not available with built-in bathtubs).

SENSE COMFORT

BATH AND SHOWER ALL-IN-ONE

No more need to select between the practicality of the shower and the comfort of the bathtub. The bathtub with an elegant and designed Iris door will please the whole family.

It's also an ideal solution for average size bathrooms. You will be charmed by its perfect finishing and the selection of panelling design.

The massages available with the Iris bathtub will simply awaken your senses.

Electronic keyboard with a sober design to enable easy massage monitoring.

The massage systems of the Comfort collection offer essential massages with easy operation.

Thanks to its door with 8 mm security glass, the Iris bathtub offers easy access. Complete with a bath screen, it also offers a practical showering space.

All the details have been thought out to give you maximum comfort. Placed on the outer edge of the bathtub, the fittings are easily accessible. And the head rest of the Iris bathtub easily transforms into a seat

SENSE NOVOTECH

EXCLUSIVE DESIGN AND TOP-OF-THE-LINE MATERIALS

This exclusive collection has a real masterpiece. Made of Novotech, a material with a high percentage of natural mineral fillers and highly pure resins, it offers two bathtub models in soft and curvy models. Particularly sold, these bathtubs have silk-touch surfaces. A real pleasure for the eyes and senses!

The interior of the bathtubs are done in Matte white finish. The exterior, on the other hand, can be personalized in 18 colours, to meet the requirements of the finest taste. You can select warm and enveloping hues or stronger and decisive ones.

The additionally proposed console adds to the functionality of the bathtubs. Equipped with fittings in essential design, it houses all the technological elements. You can opt for a wood finish or select a colour variant corresponding to the bathtub finish.

The Natural Air system that can complete your bathtub from the Novotech collection offers the Care massage with air micro bubbles with regenerative and relaxing properties. To allow you to savour your wellness experience, the insides of the bathtubs have been studied to provide you optimal immersion.

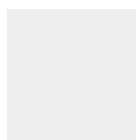

To create an intimate ambiance, the bathtubs can be optionally embellished with peripheral LED lighting.
